

RT91

DUAL mode for Digital and Analog Radio Automatic recognition of digital

AND ANALOG SYSTEMS

Built-in large speaker and microphone socket.

- / This is a portable, lightweight, Wide coverage RF power amplifier for Handheld Radio equipment , proprietary and emerging waveforms.
- / This amplifier's size makes it the perfect companion for field operation without the added weight.
- / High output power up to 30 watts.

RT91

DUAL mode for Digital and Analog Radio Automatic recognition of digital AND ANALOG SYSTEMS

Built-in large speaker and microphone socket

- / This is a portable, lightweight, Wide coverage RF power amplifier for Handheld Radio equipment , proprietary and emerging waveforms.
- / This amplifier's size makes it the perfect companion for field operation without the added weight.
- / High output power up to 30 watts.
Input power from 2 to 6 watts. With 2 to 6 Watts Handheld Radio input and covers the frequency band of VHF or UHF.
- / Status indicator

【Specifications】

- Frequency range: (Other bands need to be customized)
136MHz-174MHz / 220-260 MHz / 350MHz-400MHz / 400MHz-480MHz / 450MHz-520MHz
- Power supply: DC 13.8V (±15%)
- Input RF power: 2 - 6W (±10%)
- Output RF power: 20 - 30W
- Current: 4.0-5.5A
- Size: 135*115*35mm
- Net weight: 800g

【Supplied Accessories】

DA2000/DA1000 Body

RF cable

Mobile Mounting Bracket & Screw set

※High-power equipment Do not launch without an antenna. This device has the cooling device inside, do not touch when used for a long time.
